

Woodgrow 10mm Screened Topsoil

Woodgrow 10mm Screened Topsoil is a blend (in order by volume) of Peaty Loam, Composted Green-Waste and Silica Sand.

These natural constituents ensure our topsoil is safe and easy to work in all conditions. Free draining in wet conditions, whilst retaining moisture in dry weather.

Unlike manufactured urban soils, our topsoil has a high organic matter content and the naturally occurring nutrients are always readily available for efficient uptake by plants.

If you need our topsoil for a specific purpose; i.e. for ericaceous plants or for raised vegetable beds, we are able to advise on any additional peat, compost or fertiliser that may be required.

Typical Analysis

pH	7.4
N (%)	0.187
P (mg/l)	325
K (mg/l)	18
Mg (mg/l)	40

Phytotoxins:

Herbicides µg/kg) (organochlorine & organophosphorus)	<0.01	No Toxicity
Coal tars (mg/kg)	<0.01	No Toxicity
Phenols	0.68	No Toxicity
Copper (mg/kg) (available)	<0.10	Uncontaminated
Nickel (mg/kg) (available)	<0.10	Uncontaminated
Zinc (mg/kg) (available)	0.46	Uncontaminated
Boron (mg/kg)	0.60	No Toxicity

Stone content:

> 2mm <20mm	15.40
>20mm <50mm	< 0.01
>50mm	< 0.01
Textural Classification	Loamy Sand
Organic content (%)	9.66
Conductivity (µS)	1560
Weed/foreign matter	None
Bulk density (typical)	1.40 tonnes per m ³
